

# Aerial Rope Technical Specifications

Rosaleen Rogmans  
rosaleenrogmans@gmail.com

## **The duration, music, style, and required space of the act are adaptable.**

Act length: 6 minutes 30 seconds

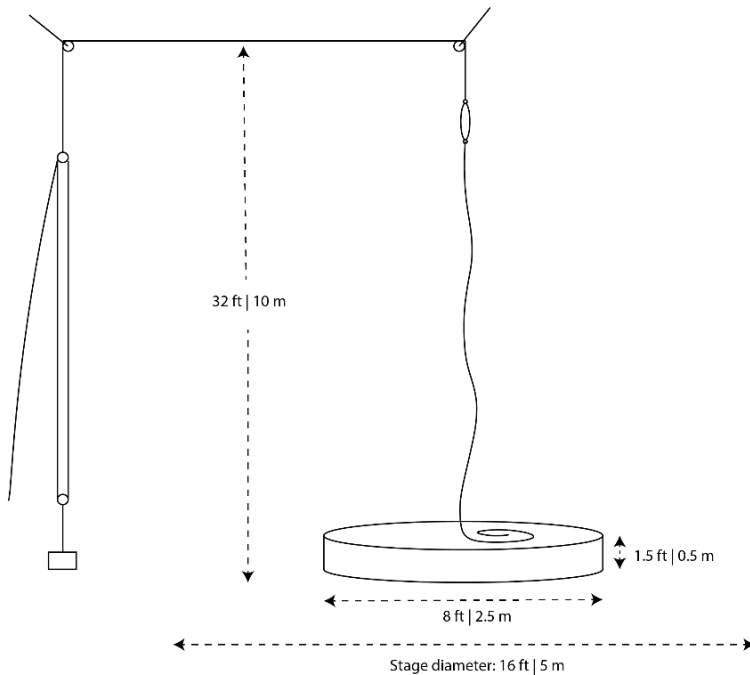

The installation of the aerial rigging must be completed by an experienced acrobatic rigger.

The rigging structures and equipment must meet all the safety requirements and ratings listed below.

The artist (Rosaleen) reserves the right to verify the rigging installation as well as the equipment.

The artist reserves the right to communicate directly with the rigger.

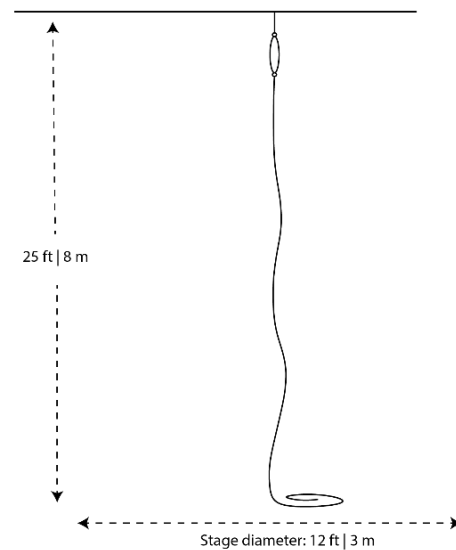

The rigging and anchor points must have a Working Load Limit (WLL) of 1500lbs (680kg).

### **Minimum dimensions for full act:**

Height: 32ft (10m)

Stage Diameter: 16ft (5m)

### **Minimum dimensions for modified act:**

Height: 25 ft (8m)

Stage Diameter: 12 ft (3m)

### **The employer must provide:**

- An experienced acrobatic rigger
- A secure and properly rated rigging structure
- A crash mat with a diameter of 8ft (2.5m) and thickness of 1.5ft (0.5m)
- An unobstructed radius of 5ft (1.5m) around the crash mat
- Audio system to play the music for the act
- A 30-minute rehearsal period in the performance space with lighting
- Access to a dressing room and warm-up space two hours prior to the performance (must be clean, warm, well lit, have access to a mirror, bathroom, and drinking water)

### **Unless otherwise specified, the artist will provide:**

- Music (an mp3 file via USB or email)
- Makeup
- Costume
- Apparatus (aerial rope) and bungee
- Carabiners and swivel
- A puller (for full act)
